THE FAROES

CHALLENGING

The Faroes consist of 18 islands, which rise from the Atlantic like green cliffs. The population of approx. 50,000 forms a completely unique society.

Everywhere on the Faroes there is beautiful countryside, changeable weather, and varied animal life. On a bicycle you can calmly and quietly enjoy the views as you travel around the countryside.

There is a wide variety of routes. Some follow the coast, others include a few hills, and there are also routes with tough stretches up the mountains and steep descents.
